### PRODUCT DESCRIPTION

The new Avide design oysters bring unique style to our home.

There are 3 lighting modes available for each model. The first and second modes use a combination of warm white and cold white LEDs to achieve different lighting effects, while the third mode uses a combination of warm white and cold white LEDs to create a natural white color temperature, doubling the power and brightness as well.

Before the very first use, the remote controller has to be paired with the lamp!

**Pairing:** Within 5 seconds of power ON, push the marked (WIFI signed) button once shortly. If the pairing was successful, the lamp will blink 3 times and the remote controller is ready to use.

**Unpairing:** Within 5 seconds of power ON, push the marked (WIFI signed) button 3 times shortly. If the unpairing was successful, the lamp will blink several times.

In addition to switching between modes, the product's RF remote controller also allows you to adjust the brightness and color temperature, and to activate the timer function: Press once for 5 minutes, press twice for 30 minutes and press three times for turn off the timer.

The product has a memory function, so the previously used mode and brightness will be active at the next time you turn it on.
